**EASE OF USE**

# HutlinerPacker®

The patented HutlinerPacker® is produced manually in the Schwalm manufacturing process. These are inflatable hollow bodies made from rubber and metal with a mountable protrusion on the side, the rubber hat.

These special devices developed by Schwalm serve to press short liners, which have been saturated in synthetic resin, onto sockets and tear formations in the main pipe and hat seals into lateral connections. The rubber hats, available in various sizes, are connected to the HutlinerPacker via a universal threaded mount. HutlinerPacker with a flexible packer body can even be used in curved shafts, depending on the site conditions.

## EQUIPMENT & ACCESSORIES

- HutlinerPackers **from DN100 to DN800**
- Rubberhats **from DN90 to DN250** in different versions
- Oval pipe accessories for egg shapes
