

The Third-Man Winch

THE ULTIMATE SOLUTION FOR PULL-IN-PLACE LINING APPLICATIONS

EFFORTLESS PRECISION, UNMATCHED PERFORMANCE

Optimize your Pull-in-Place Lining operations with the Vortex Third-Man Winch. Engineered with a focus on simplicity and ease of use, the Third-Man Winch is designed for durability and efficiency, to streamline your workflow and maximize productivity. Whether you're tackling small-scale projects or large diameter pipe rehabilitation, this winch is the perfect partner for just about any pull-in-place lining application, including UV, ambient, steam, and hot water curing methods.

Practical, Easy-to-Use Design

High Pull Force Ratings

Versatility for Pipe Rehabilitation

UNLOCK THE FULL POTENTIAL OF YOUR PULL-IN-PLACE LINING OPERATIONS

BENEFITS

- **Increased Efficiency:** Streamline your workflow and maximize productivity with our winch's intuitive design and high-performance capabilities.
- **Versatile Application:** From small-scale projects to large diameter pipe rehabilitation, our winch adapts to your needs, saving you time and resources.
- **Enhanced Safety:** With integrated safety features and stability-enhancing support legs, our winch prioritizes the well-being of you and your team.
- **Ease of Use:** Enjoy effortless operation and precise control with our winch's user-friendly design and wired remote control.
- **Reliability:** Built to withstand the rigors of demanding environments, our winch delivers consistent performance you can trust, project after project.

Experience the difference with our Third-Man Winch and **revolutionize the way you approach Pull-in-Place Lining technology** applications. With unmatched simplicity, versatility, and reliability, our winch empowers you to achieve your goals with confidence.

FEATURES

- **Dual Spool Options:** Choose the spool that best fits your needs.
 - 1200' of ¼" high-strength, 12 strand Kevlar pull rope or inner film
 - Temp. performance: melting point - 930°F, strength loss - 500°F
 - Low creep, low stretch
 - Urethane coated: acid alkaline and organic solvent resistant
- **High Pull Force Ratings:** Harness the power you need with confidence.
 - 9,500 lb. pull force rating on the Kevlar pull rope
 - 3,500 lb. pull force on the motor, for reliable performance in the most demanding conditions.
- **Versatility for Pipe Rehabilitation:** From small to large diameter pipe rehabilitation projects, our winch delivers unmatched versatility, allowing you to tackle any job with ease.
- **Manhole Access Frame:** Maintain accessibility without compromise.
 - Winch frame wide enough to allow manhole access while in use, ensuring convenience and efficiency on the job.
- **Integrated Safety Features:** Your safety is our priority.
 - Features an emergency stop button and adjustable support legs to prevent tipping
- **Wired Remote Control:** Stay in control from a distance.
 - Equipped with a wired remote control, allowing for precise operation and maneuverability.
- **All-Terrain Mobility:** Conquer any terrain with ease.
 - Outfitted with oversized all-terrain tires, ensuring smooth navigation on the most challenging surface
- **Quick Reel Adjustment:** Save time and effort
 - Mechanism designed to allow users the option to switch to free-spin quick, easy, and on the fly.
- **Transportation Ease:** Move from job to job with ease.
 - Locking reel for secure transport.
